## Facilities & services

### Water and energy saving

Despite local people drink this water, our tap water is treated but not drinkable. Bottled water and refilled eco-water in glass is available to purchase at the bar. Try to shower under 3 minutes to save energy and precious water. We run also on rain water collection. Do not use hair dryer unless very necessary in order to save energy.

### Malawi black outs and electricity

Malawi black outs can be common. We have a back up system in the restaurant and outside area for lights and we run a generator for water pump and room lights. Each room has sockets where cameras, phones and other electronic items can be charged. There is also an extension lead in your room for your convenience. The plugs are the three pin British / Malawi type and a suitable adaptor is recommended for all other electrical requirements.

### Our sustainability practices

- *We change towels only upon request. Please reuse your towels so that they're only replaced upon request. Washing towels less helps save vital water.*
- *We eliminate single-use plastics. These often end up in landfill or in the ocean. Most plastic cannot be recycled. Simple swaps will reduce waste at a low cost.*
- *We eliminate single-use toiletries. Our wash hands gel is a refillable dispenser.*
