WHAT WE WILL SEE

Safari into South Luangwa national park in Zambia green season

In Zambia, we will focus on a nine days safari into the incredible South Luangwa National Park, entering in the heart of it with safari vehicles. During nocturnal hours we will take part of game drives looking for predators. Leopard concentration is high and in this season there are many new born species including lions and impala. There are several shows that can be seen on the banks of the Luangwa River.

South Luangwa is full of its beauty during rainy season. Main tracks are still accessible and thanks to our 4x4 we will go where other means can not reach. With this itinerary we want to take away the urge for safari and nature, we want to make a refill of energy and reconnect with the purest and wildest part of Africa. The rhythms of nature will take care of us that, finally, disconnected from all that is technology, will reappear the natural rhythms of the night and a paradise for lovers of naturalistic photography.

An unforgettable safari trip to discover lions, leopards, hyenas, vultures, hundreds of elephants in a green and particular context, out of the scheme and the usual imaginary of dry Africa. Burchell's zebra is common in Luangwa Valley, while Thornicroft giraffe and Cookson's gnus are two endemic species of the park: they can only be seen here. Among the primates easy to spot yellow baboons, the velvet monkeys. The chance to see the leopard during the night safari is very high. All at an absolutely affordable price.

DURATION: 9 days with possibility of extensions in Mulanje, at our lodge-camp, or on Malawi Lake or in Zanzibar. Ask us more info!

THE JOURNEY: Safari into South Luangwa national park in Zambia green season

SOUTH LUANGWA NATIONAL PARK

9 days on the Luangwa river, into South Luangwa national park, 8 nights to enjoy full nature, in fixed tents.

Luangwa is the heart of an enchanting ecosystem boasting antelopes, zebras, buffaloes, elephants and an abundance of predators. Lions, jackals, hyenas, cheetahs, small herds of endangered wild dogs and, last but not least, relatively simple to see, the leopard. The park also houses two endemic rarity: Thornicroft's giraffe and Cookson's hartebeest. A true ornithological paradise with more than 400 species of birds. The park is famous for its leopards: this lonely feline, however, is difficult to spot, but during night safaris we will have more chances. Lions and hyenas are easy to spot. We will arrange night safaris, one of the most fascinating and fascinating experiences that can be done at South Luangwa National Park, one of the few areas in Africa where this activity is allowed.

On the IBA (Important Bird Area) and the EBA (Endemic Bird Area)

Conservation of biodiversity in general and birdlife in particular is an extremely difficult task: worldwide, nearly 12% of bird species are threatened with extinction and most of the others are in decline. The main threat is the loss of habitat, deforestation, the transformation of natural habitats into agricultural land, land reclamation and urbanization. With this logic, the concept of the Important Bird Area (IBA) concept was developed by BirdLife International (a network that has many environmental organizations dedicated to bird conservation around the world). IBAs are sites that have been identified around the world on the basis of homogeneous criteria from the various associations that belong to BirdLife International. An area is identified as an IBA if it hosts significant percentages of populations of rare or threatened species or hosts concentrations of birds of other species.

The EBA (Endemic Bird Area) is born to protect those endemic bird species in the region that do not appear anywhere else in the world.

There are around 10,000 IBAs around the world based on the above criteria; Zambia hosts 750 species of birds in 39 IBAs. Among the ornithological species present in the South Luangwa National Park, one of the 39 IBAs, with some luck, it is possible to see some endangered species including: yellow billed stork, Mycteria ibis, Falco dickinsoni, Plocepasser rufoscapulatus, Vidua codringtoni, Vidua obtusa.

MEANS OF TRANSPORT

All distances will be covered with one or more means Toyota or Land Rover or similar off-road 4 × 4 or depending on numbers vehicle that we consider appropriate. Vehicles inside the park are special vehicles modified to enjoy as much as possible our game drives.

ACCOMMODATION

This trip was designed for 8 nights in simple fixed tents in South National Park on the river banks, equipped with outside common

showers and toilets; this also allows us to cut costs: it was chosen for its absolutely unique position in close contact with the nature of the park that will give us unforgettable emotions. Elephants cross the field, hippos eat grass during night time and giraffes are approaches the area. There is a swimming pool and a restaurant. Lodging in a lodge / chalet / hotel is intended, where not otherwise required, in double rooms; could be replaced for technical-organizational problems without however altering the initial project.

The facilities have been carefully chosen following an idea of land conservation and sustainability of the journey, preferring positions

in close contact with nature. For a complete list of the lodge / camping , please [write to us!](#)

PERIOD/SEASON

Temperatures depend largely on the season, from the latitudes and altitudes. On the right there is a table indicative of average temperatures in the different seasons. The hottest month is November, the coolest month is June / July. The dry season is from April / May to November. The wet season runs from December to March / April, during this time you can see the parks in their green splendor; some babies of mammals are born in this period as well as many birds cross the mating season, changing plumage and courting females. We recommend both seasons, both in fact have a special charm.

Contact us for more information on the current season, they are not all the same!

TEMPERATURES °C AVERAGE	FEBRUARY	JULY	NOVEMBER
Blantyre	min 18 - max 27	min 7 - max 23	min 20 max 32
South Luangwa national park	min 26 - max 39	min 22 max 32	min 28 max 43

ROADS

We will cover approx. 2000 km, entirely inside the park

TO KNOW

In order to save time, lunches could be organized in a faster way, based on a sandwich, while dinner always well organized. [READ FAQ](#) and [WRITE US](#) for more info!

SAFARI GUIDE

The various **game drives**, (the excursion in 4 × 4 organized for the sighting of animals), will take place in the daytime and at night with the jeep.

It is not required to take particular preparation except the desire to get up at dawn and patience required in search of animals. Note that the game drives will be held during the coolest hours of the day (sunrise and sunset), when animals are easier to spot.

Being self-driven, however, we may decide to stop on a scene for as long as possible, always following the rules of the park. The safaris are conducted in open jeeps equipped for the safari.

Photographers during the safari will always be permitted to bring their own camera equipment. The guides will aim first to position the vehicle in the best position, where safety and security allows. Inside the park the jeeps/vehicles will NOT communicate by radio with each other, to avoid the crowd on an animal and thus preserve the peace.

Then the jeeps/vehicles must be in the right place at the right time to see what you want; we prefer that a sanctuary of nature as the South Luangwa national park preserve this spirit of adventure that so characterizes it.

Important information: in parks within the camping, lodging area will be asked to sign a disclaimer of responsibility required to access to the place.

TRAVEL PHILOSOPHY

We call our trips, “expeditions”, a word which seems to better encompass the spirit of adventure and discovery of wild places, the capacity of necessary adaptability and the desire of sharing this experience with others.

Our programs are carefully prepared and are born from our personal experiences over the years of the places where we spend most of the year. This allows us to share the knowledge of the environment and local communities to whoever wishes to experience an adventure rather than an organized trip. During our expeditions, we like to improvise, a ballgame in a small out-of-the-way village or take a break to taste the local cuisine, or stop to meander through the colorful stands of fruits and vegetables in an outdoor marketplace.

We don't travel with air conditioning observing Africa through closed windows, but we live breathing in the smells and even getting a little dirty from the red earth without thinking all day about how much further we're going, when will there be roads of asphalt or what will we eat for dinner that night.

We experience Africa smelling the atmosphere, absorbing the colors, experiencing the local fruit and vegetable markets, being surrounded by children on the road without prejudice.

People who travel with us are not just thinking about reaching a destination but about enjoying the infinite moments during the trip to appreciate the spectacular sights of Africa even when we stop and there is nothing to do. “Doing nothing” transforms your sense of hearing into listening and your sense of watching into seeing. We prefer to “lose” time in order to better appreciate the wonders of Africa.

We don't appreciate those who always want to know “what can we do for fun”, what activities or hobbies, when there really is nothing to do but wait for the sunset or for a lion to yawn: Africa has a different rhythm of life. We don't appreciate those who travels with their entire house in their suitcase and who wants to find all the comforts of home on the road; stress must stay at the airport because it does not fit with this continent.

Who are appalled and shocked at a local food dish or who cry because there is no hot water need not apply; these are luxuries we give up in respect for the communities of a Continent that suffers poverty and underdevelopment.

We don't appreciate those who do not have respect for animals or nature, who waste water, energy and resources without environmental respect, who does not ask for help and does not give help and who does not take care of our equipment.

This is our philosophy: think like us and you will be rewarded.

1° DAY MFUWE ZAMBIA, SOUTH LUANGWA

Arrival at Mfuwe international airport in Zambia. Transfer to camp located along the river. Overnight stays on the banks of the Luangwa River. Hippos, elephants and giraffes often cross the river.

2°-3° DAY SOUTH LUANGWA NATIONAL PARK

The rich diversity of habitats will be clear in our first morning safari and during the night drive, 4x4 safaris during evening hours, when it is easier to spot the nightlife: inside South Luangwa National Park looking for lions, leopards, hyenas, genets, owls, nightjar ... Fixed tents on the banks of the Luangwa River.

4° DAY SOUTH LUANGWA NATIONAL PARK

ON safari, a word used to describe off-road inside the park. During the morning we will try to go back to our footsteps, where the evening before some particular scene captured our attention or exploring new areas. In the afternoon night safaris, looking for leopardS or all other animals, scents, smells, sounds, stars, this evening will give us a gift. Overnight as the previous night.

5° DAY SOUTH LUANGWA NATIONAL PARK

Safari in the morning and night safaris. We will dedicate the day to watch animals during the cooler hours of the day: in the morning, just after dawn, and in the afternoon, before and after sunset. We will try, as every day, to take full advantage of the opportunities to spot all animals. In the morning it is easy to see elephant cross the river, as well as impala and puku devote themselves to defending the territory. Baboons are busy with the daily toilet and some little fall from the top of some "sausage tree" fortunately without any consequences. Overnight as the previous night.

6° DAY SOUTH LUANGWA NATIONAL PARK

Depending on what we have seen in the previous days, the predators we have seen or the particular scenes we witnessed will explore different areas of the park, looking for numerous animals within the park. Often, the only view of the landscape shines our eyes and heart. In the afternoon as always afternoon and night safari, to pick up some new scenes and with a little luck to spot the pearl civet or other birds and predators. Overnight in as the previous night along the Luangwa River.

7° / 8° DAY SOUTH LUANGWA NATIONAL PARK

A morning safari, when light is better, to track traces of felids and try to spot even the rare wild dog, an endangered canine living in South Luangwa, one of the few parks in Africa where you can see it. Return to the camp and relax. At evening, a night safari to see predators during hunting, including night raptors. With the light of the spotlight, which is equipped with the means we will use for the safari, we will be able to spot and photograph animals in a very original way. Here we have seen lion hunting, many hyenas, leopard hunting and in general predators fully active. Overnight as the previous night.

9° DAY SOUTH LUANGWA NATIONAL PARK - MFUWE

Transfer to Mfuwe international airport, international flight.

CONSIGLI DI VIAGGIO

HEALTH

No obligation to vaccination.

We recommend these vaccines:

- tetanus
- typhoid fever
- hepatitis A and B

Concerning malaria, disease transmitted by the bite of the female Anopheles mosquito, its prevention is accomplished, first of all, with a mechanic prevention i.e. avoiding getting stung, following these rules:

- sleeping under mosquito tents
- using insecticide to get rid of possible mosquitos
- after sunset, when mosquitos are more active, avoiding leaving parts of the body uncovered, wearing light-colored long trousers and long-sleeve shirts, because dark colors attract mosquitos and spraying parts of the body uncovered with Autan Extreme

For the use of any possible antimalarial drugs we suggest that you consult your Public Health Service; health norms change very rapidly.

TRAVEL MEDICAL KIT

We suggest that you take with you a small supply of these medicines:

- analgesics/fever reducers: acetylsalicylic acid and nimesulide
- antibiotics like ciproxin or amoxicillin or clavulanic acid
- antimalarials: anyway carry with you 2 packs of Lariam for emergency cases
- antidiarrheals: loperamide or kaolin in case of symptoms (to use only if really necessary!)
- rehydration salts: in case of fluid leaks
- against car or air sickness: a pack of pills or chewing-gums
- antihistamines: in case of allergic reactions
- scissors, tweezers and thermometer
- suntan cream
- insecticides (like Autan Extreme)

LUGGAGE

Due to space and cohabitation reasons each person shall have just a big backpack (max 15 kg), with max. dimensions 30x40x50 cm (60 liters) besides a standard small bag with photographic equipment.

We recommend that you comply with the dimensions.

We recommend mountain backpacks with shoulder straps.

CLOTHES LAUNDRY

It will be possible to wash your clothes where we will stop at least for 2 nights

ECO TOURISM

AFRICA WILD TRUCK SUPPORT

Africa Wild Truck travel philosophy has the aim to minimize the potential negative impacts that derive from tourism socially, economically and environmentally. We know that tourism has got a big potential of bring benefits in remote areas as economical growth, develop and conservation. Travel in a responsible way means follow a specific travel philosophy that we hope is useful to preserve the beauty and the culture of this marvelous Continent to future generations.

SOCIAL COMMITMENT

We think that the contact with local people and cultures is one of the essential aspects of a travel. Comprehension, tolerance and mutual respect between different cultures often mean also simple rules to follow that will be exposed to the traveler before as well as during the travel. We encourage the traveler to have an open attitude and learn customs and traditions, as well as basic words in local language.

We live here and we give local people a job so that travelers, once more, may have the possibility to interact with African people and so that money is directed to the population.

We support some territorial and social maintenance projects, both directly, involving our travelers into donating to AROUND AWT and indirectly, visiting distant areas bringing economic development and suggesting to donate one's own contribution to projects as conservation or social projects

We are supporting associates and members of associations like AITR, Italian Association for Responsible Tourism and TIES, International Ecotourism Society.

We live here so we have the possibility to monitoring the political and social situation of our destinations, communicating, if possible, all relevant information to travelers before leaving.

ECONOMIC COMMITMENT

We lean on suppliers, products and services representing the option that is the most ethical available, even when it means paying a price reasonably higher compared to other options on the market.

We use accommodations which are chosen carefully, following an idea of conservation of the territory and sustainability of the travel, preferring positions in close contact with nature. Where possible we lean on small accommodations managed by local people that live on the territory, like us.

We don't lean on facilities or suppliers where we know there is exploitation of labor.

Where possible we stock up in the markets, buying fruit and vegetables directly from small producers, thereby supporting small economies.

We encourage travelers to buy local artifacts that do not harm the environment and that do not support illegal trafficking.

ENVIROMENTAL COMMITMENT

- We use the Internet and e-mails as main means of communication; this minimizes the waste associated with the use of printed paper.

We use, where possible, recycled paper for all our printed releases.

We support and donate part of our takings to organizations like AROUND AWT and other associations also through the programming of the travels/expeditions. We are members of the TIES, International Ecotourism Society and of AITR, Italian Association for Responsible Tourism.

We minimize the waste like electric energy and water using the truck's batteries to recharge the electric material and managing the reserves of water in an accurate way.

We recycle: nothing is thrown away in Africa! Where possible we deliver part of what we think is no longer useful, to those who need it. Besides we follow, where possible, this simple rule: what in Africa is harmful for the environment and cannot be recycled must be taken back home! Used batteries are a simple example.

We use small facilities that minimize negative impacts on the environment. We lean, where possible, on facilities built with local materials, as well as facilities that use renewable sources of energy like solar panels.

YOUR SUPPORT

Inform on your travel destination before leaving. Read books and consult tourism guides to collect information on culture, politics, geography, religion and traditions of the places you are going to visit. Learn a few basic words you'll need to communicate; sometimes a few words can make you get on touch more with the local culture. Inform on how to behave to respect customs and beliefs.

Dress in a respectful way. It's really easy to cause embarrassment or offend with an inappropriate clothing.

Buy local objects and use local services; this increases the local economy. But be careful what you buy: do not feed illegal trafficking or types of trade that are harmful to nature.

Pay a fair price for what you buy. Negotiating is always part of the local life; small sums of money mean big sums for a local family.

Ask permission before taking photographs and if you promise someone to send a photo, or a gift, please, keep your promise.

Avoid showing wealth and opulence especially in poor communities, where you are a guest.

Help local communities supporting development projects, rather than giving huge tips to individuals. Together we can develop new ideas. Take a look at the projects we support like AROUND AWT.

If you want to leave something, as for example giving material to a local school, or cloths to whom needs them, try to give them to an influential person. In this way the material will be divided as fairly as possible. Do not give money or medicines to individuals: we know projects to which we can give this type of material.

Never feed wild animals, especially within the parks: wild animals have not to depend on man for their subsistence.

Respect the environment: avoid leaving garbage around and if you smoke, please, do not leave your cigarette butts.

Once home think how you can help the development programs to help the country you've had the privilege to visit. Choose a Tour Operator that follows a travel philosophy that supports eco-tourism.

We support some social maintenance projects, through scientific popularization, writing guides and articles, photography, donations, our projects of AROUND AWT, visiting distant areas and so bringing economic development; if you know topics, groups, projects we don't know share them with us: we can support them and ensure that many people may be involved.
